

Jaden Stock

Full-Stack Developer · BSc Computer Science

Profile

Second-year Computer Science student at Stellenbosch University with extensive experience building and scaling production web applications. Built a custom e-commerce platform that handles thousands of customers and orders, and currently developing Ticket Brew, an event operations platform. Combines hands-on engineering, production systems experience, and leadership as head boy and mentor to first-year students at Stellenbosch, bringing a collaborative, detail-oriented approach and genuine enthusiasm for learning new technologies.

Projects & Work Experience

Skills

Programming Languages

JavaScript, TypeScript, Java, Python, SQL, HTML & CSS

Frameworks & Systems

React, Next.js, Node.js, Tailwind, Drizzle ORM, PostgreSQL, MongoDB, Supabase

Tools & Platforms

Git, GitHub, Dokploy, Vercel, Netlify, AWS, Docker, Figma, Premiere Pro, After Effects, Paystack

Interests

My path into tech started through video and music production, so creativity has always been part of how I think and design. I'm currently expanding into DevOps, cybersecurity, and compliance.

Aside from building stuff, you'll find me at the piano, on the tennis court, on a hike, or in the gym.
